

# Informed Consent for Grommet Insertion: Video and Confirmation

Dear Patient and/or Carer,

Thank you for considering grommet insertion surgery. This procedure involves placing small ventilation tubes in the eardrums to allow air into the middle ear and help clear fluid. To help you understand the procedure, its benefits, risks, and the recovery process, we ask that you please watch the educational video below.

This also includes a questionnaire to guide you through the process and confirm your understanding and consent.
